802.1X Supplicant Configuration (MacOSX)

Firstly make sure that AirPort is enabled

(Please note that these instructions also outline the connection procedure for each subsequent connection to eduroam)

1. Click on the AirPort icon on the top right of the screen

2. Select the “eduroam” SSID from the drop down list (Note: if the “eduroam” SSID doesn’t appear, you may be out of range):

3. A new box will appear, prompting for a username and password, for the username field you must put your username with the @rhul.ac.uk domain added to the end. Then enter your password, leave other settings on default and click “OK”:

4. A new window will appear prompting confirmation of the certificate, simply click “continue”:

5. You should now be connected to eduroam and have access to the internet.
