

The Institute of Leadership and Management in Health Interprofessional Institute (Health & Social Care)

WORKSHOP - 23rd June 2009

Dorich House, Kingston Vale, Kingston SW15 3RN

Equality and Diversity in the Management and Professional Practice of Health and Social Care

Objectives:

- to develop a local knowledge exchange network among researchers in the three SWan institutions and local practitioners
- to identify key themes for subsequent practice-informed research
- to organise a regular seminar series
- to put forward research proposals

At this initial stage of early interest, we are leaving the scope of the day open to include the following subjects: race and ethnicity; gender and aging and migration, as well as others you identify for us as being of interest.

We envisage the day revolving around two guest speakers chosen for their expertise in developing and managing large-scale cross-disciplinary research in one or more aspects of the day's 'umbrella' focus.

The day's focus is under-researched but critical for all of us. We expect that the event will be of particular interest to researchers in aspects of:

- health and social care;
- management and professional practice;
- social inequality and diversity or any combination of the above

If you would like to attend the Workshop planned for 23rd June 2009 or register your interest for future events, please email Wendy Murphy (W.Murphy@kingston.ac.uk)

For more details or an informal discussion about this initiative, please contact Christina Butler by email christina.butler@kingston.ac.uk or telephone 020 8547 2000 (ext 65123)
