

Lego Robots Egg Race Competition

On Thursday 11th July 2013, teams of pupils from Westgate, Thornden and Kings' schools in Winchester competed in a STEM competition run at Kings' School by Professor Dave Cohen, from Royal Holloway University of London.

Pupils first decorated their eggs and then followed instructions to construct their robots. The pupils then wrote computer programs to instruct the robots to complete a series of challenges. The activity helped the pupils learn about team work and time constraints as well as developing some programming skills.

The winning robot was a Kings' team and the best egg was from Westgate.
