| Aims:              | To introduce students to techniques of quantitative and qualitative data analysis  
                      To equip students with the skills to design and carry out their own analyses | | |
| Learning Outcomes: | The unit will enable students to:  
1) Understand and carry out basic statistical procedure for quantitative data analysis  
2) Use a computer package for analysing quantitative data  
3) Be familiar with a large cross-sectional survey dataset  
4) Understand and use techniques of coding and analysis associated with qualitative data analysis | | |
| Course Content:    | Week 1: Variables and Levels of Measurement  
Week 2: Measures of Central Tendency and Dispersion  
Week 3: Reading and Producing Charts and Tables  
Week 4: The Sampling Distribution of the Sample Mean  
Week 5: Confidence Intervals for the Mean  
Week 7: Transcribing, Coding and Indexing Qualitative Data  
Week 8: Integrating Field Notes and Interview Data  
Week 9: Content and Narrative Analysis  
Week 10: Discourse Analysis  
Week 11: Recap/Revision | | |
| Teaching & Learning Methods: | Each week: an hour-long lecture and an hour-long lab session. There are also several hours set aside each week for one-to-one tuition. | | |
| Details of teaching resources on Moodle: | The Moodle page contains the following resources: Unit outline, assignment details, lab session instructions, lecture slides, and extracts from core readings. | | |
