Please note: NEW FOR 2014-15

Guidelines for Participation in Group Work:

- Non-participation / non-collaboration is considered a failure of attendance. Students who do not participate in scheduled (class or student-led) sessions will be marked absent. Missing more than 20% of scheduled sessions without good cause means the attendance requirements have not been satisfied, which will adversely impact the course unit outcome.

- If a tutor believes a student is non-participating, the student will be invited to attend a meeting to discuss their lack of participation and / or collaboration. Non-participating / non-collaborating students may also be issued with a formal warning.

- Non-participating / non-collaborating students will be penalized in line with the marking criteria (see especially ‘Group Dynamics’ and ‘Process Log’). Students must maintain a process log throughout the rehearsal and preparation period. This must be maintained and presented on demand. The final process log including critical reflection must be submitted via Turnitin one week after the assessment. The process log will be used to moderate group marks up or down by 20% (20 points).
