

Royal Holloway, University of London
Course specification for an undergraduate award
BSc PSYCHOLOGY (C800)

Section 1 – Introduction to your course

This course specification is a formal document, which provides a summary of the main features of your course and the learning outcomes that you might reasonably be expected to achieve and demonstrate if you take full advantage of the learning opportunities that are provided. Further information is contained in the University prospectus, and in various handbooks, all of which you will be able to access online. Alternatively, further information on the University's academic regulations and policies can be found [here](#). Further information on the University's Admissions Policy can be found [here](#).

Your degree course in BSc Psychology is delivered in three stages, each of which comprises one year of full-time study during which the student must follow modules to the value of 120 credits. The curriculum is based around a set of mandatory modules. Stage one provides a foundation for the later stages by providing a grounding in the main areas of psychology. In stage two, several of these areas are developed further and in greater depth. In stage three, students are given the opportunity to study specialist areas of psychology and to undertake an original research project. The Single Honours course is approved by the British Psychological Society as providing Graduate Basis for Chartered Membership (GBC). Successful completion of the third year Research Project and the achievement of a minimum 2:2 (lower second class honours) is a British Psychological Society requirement for GBC recognition and therefore GBC status will not be given to any student who is awarded a degree with a classification lower than a 2:2 or without successful completion of the Research Project module.

While Royal Holloway keeps all the information made available under review, courses and the availability of individual modules, especially optional modules are necessarily subject to change at any time, and you are therefore advised to seek confirmation of any factors which might affect your decision to follow a specific course. In turn, Royal Holloway will inform you as soon as is practicable of any significant changes which might affect your studies.

The following is a brief description for some of the most important terminology for understanding the content of this document:

Degree course – May also be referred to as 'degree programme' or simply 'programme', these terms refer to the qualification you will be awarded upon successful completion of your studies.

Module – May also be referred to as 'course', this refers to the individual units you will study each year to complete your degree course. Undergraduate degrees at Royal Holloway comprise a combination of modules in multiples of 15 credits to the value of 120 credits per year. On some degree courses a certain number of optional modules must be passed for a particular degree title.

Section 2 – Course details			
Date of specification update	April 2024	Location of study	Egham Campus
Course award and title	BSc Psychology	Level of study	Undergraduate
Course code	1365	UCAS code	C800
Year of entry	2024/25		
Awarding body	Royal Holloway, University of London		
Department or school	Department of Psychology School of Life Sciences and the Environment	Other departments or schools involved in teaching the course	N/A
Mode(s) of attendance	Full-time	Duration of the course	3 years
Accrediting Professional, Statutory or Regulatory Body requirement(s)	British Psychological Society – In order to be eligible for Graduate Basis for Chartered Membership of the British Psychological Society you must achieve a minimum of a lower second class honours degree and pass PS3201 Research Project.		
Link to Coursefinder for further information:	https://www.royalholloway.ac.uk/studying-here/	For queries on admissions:	https://royalholloway.ac.uk/applicationquery

Section 3 – Degree course structure					
3.1 Mandatory module information					
The following table summarises the mandatory modules which students must take in each year of study					
Year	Module code	Module title	Credits	FHEQ level	Module status (Mandatory Condonable MC or Mandatory Non-Condonable MNC)
1	PS1010	Understanding Psychological Research	30	4	MNC
1	PS1030	Understanding Individuals and Groups	15	4	MC
1	PS1040	Understanding Development across the Lifespan	15	4	MC
1	PS1070	How to be a Psychologist	15	4	MC
1	PS1080	Understanding Perception and Cognition	15	4	MC
1	PS1090	Understanding Neuroscience	15	4	MC
1	PS1110	Understanding Mental Health and Wellbeing	15	4	MC
2	PS2010	Psychological Research Methods and Analysis	30	5	MNC
2	PS2021	Cognitive Psychology	15	5	MC
2	PS2030	Social Psychology	15	5	MC
2	PS2040	Developmental Psychology	15	5	MC
2	PS2050	Personality and Individual Differences	15	5	MC
2	PS2061	Brain and Behaviour	15	5	MC
3	PS3201	Research Project	45	6	MNC

This table sets out the most important information for the mandatory modules on your degree course. These modules are central to achieving your learning outcomes, so they are compulsory, and all students on your degree course will be required to take them. You will be automatically registered for these modules each year. Mandatory modules fall into two categories: 'conดอนable' or 'non-conดอนable'.

In the case of mandatory 'non-conดอนable' (MNC) modules, you must pass the module before you can proceed to the next year of your course, or to successfully graduate with a particular degree title. In the case of mandatory 'conดอนable' (MC) modules, these must be taken but you can still progress or graduate even if you do not pass them. Please note that although Royal Holloway will keep changes to a minimum, changes to your degree course may be made where reasonable and necessary due to unexpected events. For example: where requirements of relevant Professional, Statutory or Regulatory Bodies have changed and course requirements must change accordingly, or where changes are deemed necessary on the basis of student feedback and/or the advice of external advisors, to enhance academic provision.

3.2 Optional modules

In addition to mandatory modules, there will be a number of optional modules available during the course of your degree. Although Royal Holloway will keep changes to a minimum, new options may be offered, or existing ones may be withdrawn. For example, where reasonable and necessary due to unexpected events, where requirements of relevant Professional, Statutory or Regulatory Bodies (PSRBs) have changed and course requirements must change accordingly, or where changes are deemed necessary on the basis of student feedback and/or the advice of External Advisors, to enhance academic provision. There may be additional requirements around option selection; please contact the Department for further information.

In stage 2, you will select one option from PS2110 How Can Psychology Change the World: Applied and Developmental Perspectives (15 credits) OR PS2120 How Can Psychology Change the World: Clinical and Neuroscience Perspectives (15 credits).

In stage 3, you will select options to the value of 75 credits from the list of FHEQ Level 6 modules offered by the Department for students on the BSc Psychology, as set out in your undergraduate student handbook.

These may be selected entirely from available Psychology third year options (as listed in the departmental student handbook) or you may substitute up to a maximum of 30 credits with appropriate modules in other departments. Students wishing to take an option (s) from another department(s) must check with the other department to ensure there is space available on the relevant module, and then discuss this with the Director of Undergraduate courses (Psychology) to clarify that the module is at an appropriate level and to agree the choice.

Section 4 – Progressing through each year of your degree course

For further information on the progression and award requirements for your degree, please refer to Royal Holloway's [Academic Regulations](#).

Progression throughout the year/s is monitored through performance in summative or formative coursework assignments. Please note that if you hold a Student Visa and you choose to leave (or are required to leave because of non-progression) or complete early (before the course end date stated on your CAS), then this will be reported to UKVI.

All first-year undergraduate students are required to take and pass the non-credit bearing Moodle-based Academic Integrity module SS1001 to progress into the second year of study (unless their course includes the alternative mandatory SS1000 module). The pass mark for the module assessment is stated in the on-line Academic Integrity Moodle module. Students may attempt the assessment as often as they wish with no penalties or capping. Students who meet the requirements for progression as stipulated in the [Academic Taught Regulations](#) but fail to pass the Moodle-based Academic Integrity module will not be permitted to progress into their second year of academic study.

Section 5 – Educational aims of the course

- to produce a scientific understanding of mind, brain, behaviour, and experience, and of the complex interactions between these;
- to present multiple perspectives in a way that fosters critical evaluation;
- to allow students to gain an understanding of real life applications of theory to the full range of experience and behaviour;
- to develop in students an understanding of the role of empirical evidence in the creation and constraint of theory and the way in which theory guides the collection and interpretation of empirical data;
- to provide knowledge of a range of research skills and methods for investigating experience and behaviour, culminating in an ability to conduct research independently;
- to provide students with the knowledge and skills to be able to appreciate and critically evaluate theory, research findings, and applications.

Section 6 - Course learning outcomes			
In general terms, the courses provide opportunities for students to develop and demonstrate the following learning outcomes. (Categories – Knowledge and understanding (K), Skills and other attributes (S), and Transferable skills (*))			
Course learning outcome	Level 4	Level 5	Level 6
1. Develop and demonstrate knowledge, understanding, and critical judgement in the core areas of Psychology (Biological, Social, Cognitive, Developmental, Personality & Individual Differences).	1.4.1. Recognise and understand key theories and research underpinning the core areas of psychology. 1.4.2. Start developing critical judgment in the core areas of psychology by recognising strengths and weaknesses of their knowledgebase.	1.5.1. Demonstrate broad and deep knowledge of the core areas of psychology. 1.5.2. Be able to critically evaluate research and theory in the core areas of psychology.	1.6.1. Develop an in-depth understanding and critical judgment of the core areas of psychology. 1.6.2. Apply knowledge of the core areas of psychology to the real-world.
2. Develop and demonstrate knowledge about the conceptual, ethical, historical, socio-cultural, and practical issues in research methods, final research project, and the core areas of Psychology.	2.4.1. Recognise and understand conceptual, ethical, historical, socio-cultural, and practical issues in research methods and the core areas of Psychology. 2.4.2. Start developing critical judgment of conceptual, ethical, historical, socio-cultural, and practical issues in research methods and the core areas of Psychology.	2.5.1. Demonstrate solid knowledge of conceptual, ethical, historical, socio-cultural, and practical issues in research methods and the core areas of Psychology. 2.5.2. Think critically about conceptual, ethical, historical, socio-cultural, and practical issues in research methods and the core areas of Psychology.	2.6.1. Develop an in-depth understanding of conceptual, ethical, historical, socio-cultural, and practical issues in research methods and the core areas of Psychology. 2.6.2. Apply knowledge of conceptual, ethical, historical, socio-cultural, and practical issues in Psychology to your research project and the real world.
3. Express concepts and research outcomes from multiple perspectives through written, oral, and visual means.	3.4.1. Understand conventions for presenting concepts and research outcomes in written form. 3.4.2. Understand appropriate forms of oral and visual presentations of research outcomes.	3.5.1. Demonstrate the use of writing conventions in psychological science to communicate concepts and research outcomes. 3.5.2. Demonstrate the ability to communicate psychological concepts and research outcomes in oral or visual form.	3.6.1. Apply writing skills to communicate psychological concepts or research outcomes. 3.6.2. Design oral and other presentations to communicate research findings for specific purposes or audiences.
4. Utilise numerical, textual, and other forms of data through the lens of appropriate psychological theory.	4.4.1. Understand the link between psychological theory and their basis in numerical, textual, or other forms of data. 4.4.2. Understand appropriate methods for the analysis of numerical, textual, and other	4.5.1. Demonstrate an understanding of how empirical data informs psychological theories. 4.5.2. Demonstrate the use of numerical, textual, and other forms of data and	4.6.1. Apply numerical, textual, or other forms of data to provide evidence-based interpretations and recommendations. 4.6.2. Further develop the ability to design studies to address research questions

	forms of data to answer questions related to psychological theory.	appropriate analysis methods to answer specific research questions.	through empirical research with numerical, textual, and other forms of data.
5. Develop skills in the use of a variety of psychological tools and specialist computer software.	5.4.1. Become familiar with a variety of psychological tools, including laboratory equipment, psychometrics and measurement techniques. 5.4.2. Become familiar with specialist software for the collection, management and analysis of psychological data.	5.5.1. Demonstrate proficiency in the use of appropriate psychological tools for exploring testable hypotheses and research questions. 5.5.2. Develop skills in using appropriate software for the collection, management and analysis of psychological data.	5.6.1. Use knowledge of psychological tools in evaluating, planning and carrying out original empirical research. 5.6.2. Apply software skills to all stages of data collection, project management and data analysis in original empirical research.
6. Develop an understanding of the ethical frameworks that apply to research, working with people and personal study. Be aware of legislative and regulatory requirements that apply to psychological practice.	6.4.1. Understand the importance of ethics and ethical practice for psychologists, psychological practitioners, personal study and working with people more generally. 6.4.2. Recognise and understand ethical frameworks and ethical implications of research.	6.5.1. Demonstrate the ability to analyse, critically review and evaluate ethical dilemmas and problems. 6.5.2. Demonstrate the ability to evaluate the ethical implications of research.	6.6.1. Apply knowledge of ethical principles to identify ethical issues and use ethical reasoning in real-world situations. 6.6.2. Identify ethical considerations and be aware of approval procedures in others and one's own research.
7. Engage in self-directed study and project management to accomplish team goals. Assume responsibility for one's own and group progress and evaluate personal strengths and weaknesses for future growth and wellbeing.	7.4.1. Understand what is meant by independent self-directed study and how to manage personal workload. 7.4.2. Understand the key principles of group work to ensure effective teamwork to help accomplish team goals.	7.5.1. Demonstrate the ability to engage in self-directed independent study and management of personal workload. 7.5.2. Demonstrate an ability to work effectively within a team to help accomplish team goals.	7.6.1. Apply principles of independent self-directed study to evaluate personal weaknesses and strengths in one's development. 7.6.2. Design group-based research projects and ensure its effective management from start to finish.
8. Apply the key concepts and principles of Psychology to real-world situations, including the workplace.	8.4.1. Understand how psychological concepts and principles can be used to inform real-world situations. 8.4.2. Be able to summarise some real-world settings that psychology can be applied to inform best practice.	8.5.1. Demonstrate an ability to use psychological concepts and principles to inform real-world situations. 8.5.2. Critically evaluate the use of psychological concepts and principles in their application to real-world situations.	8.6.1. Apply concepts and principles from psychology to real-world situations. 8.6.2. Design interventions and initiatives that use psychology to real-world situations.
9. Critically evaluate issues, information, and data to effectively solve problems.	9.4.1. Recognise the importance of critical evaluation for effective problem solving.	9.5.1. Develop evaluative skills by critically analysing issues, information and data.	9.6.1. Frequently apply critical evaluation in your assessment of issues, information and data.

	9.4.2. Understand how to critically evaluate issues, information and data.	9.5.2. Demonstrate an ability to use critical thinking and evaluative skills to effectively solve problems.	9.6.2. Develop into a confident critical thinker.
10. Collaborate, interact, and communicate with colleagues, research participants, and outside agencies effectively.	10.4.1. Recognise the importance of communicating and collaborating effectively with others. 10.4.2. Understand what effective communication and collaboration involves.	10.5.1. Develop a range of communication skills, including teamwork, leadership skills, etc. to enable effective communication and collaboration with others. 10.5.2. Demonstrate an ability to collaborate and communicate effectively with others.	10.6.1. Apply a range of communication skills, including good teamwork, leadership skills, etc. in your communication and collaboration with others. 10.6.2. Use these communication skills to advance your psychological literacy, employability and personal development.

Section 7 - Teaching, learning and assessment

Teaching is mostly by means of lectures and seminars, the latter generally providing a forum for students, with the support of their instructors, to engage in critical analysis and discussion of topics in a smaller and more interactive setting. Laboratory classes and practical workshops are also key teaching forums. Learning is through participation in teaching sessions, designated reading, and completion of coursework. Essays and short written answers ensure that the skills of exposition and critique are developed and evaluated. At the end of the course, most students are required to apply the knowledge and skills they have acquired in the conduct of a piece of original research under the close supervision of a member of staff. Assessment of knowledge and understanding is typically by a combination of formal, unseen written examination and coursework. Full details of the assessments for individual modules can be obtained from the [Department](#).

Contact hours come in various forms and may take the form of time spent with a member of staff in a lecture or seminar with other students. Contact hours may also be laboratory or, studio-based sessions, project supervision with a member of staff, or discussion through a virtual learning environment (VLE). These contact hours may be with a lecturer or teaching assistant, but they may also be with a technician, or specialist support staff.

The way in which each module on your degree course is assessed will also vary. Assessments designated as 'summative' will receive a mark which will count towards your overall mark for the module, and potentially your degree classification, depending on your year of study. On successful completion of the module you will gain the credits listed.

More detailed information on modules, including teaching and learning methods, and methods of assessment, can be found via the online [Module Catalogue](#). The accuracy of the information contained in this document is reviewed regularly by the university, and may also be checked routinely by external agencies.

Section 8 – Additional costs
There are no single associated costs greater than £50 per item on this degree course.
These estimated costs relate to studying this particular degree course at Royal Holloway. General costs such as accommodation, food, books and other learning materials and printing etc., have not been included, but further information is available on our website.

Section 9 – Indicators of quality and standards	
OAA Framework for Higher Education Qualifications (FHEQ) Level	4-6
Your course is designed in accordance with the FHEQ to ensure your qualification is awarded on the basis of nationally established standards of achievement, for both outcomes and attainment. The qualification descriptors within the FHEQ set out the generic outcomes and attributes expected for the award of individual qualifications. The qualification descriptors contained in the FHEQ exemplify the outcomes and attributes expected of learning that results in the award of higher education qualifications. These outcomes represent the integration of various learning experiences resulting from designated and coherent courses of study.	
OAA Subject benchmark statement(s)	http://www.qaa.ac.uk/quality-code/subject-benchmark-statements
Subject benchmark statements provide a means for the academic community to describe the nature and characteristics of courses in a specific subject or subject area. They also represent general expectations about standards for the award of qualifications at a given level in terms of the attributes and capabilities that those possessing qualifications should have demonstrated.	

Section 10– Intermediate exit awards (where available)		
You may be eligible for an intermediate exit award if you complete part of the course as detailed in this document. Any additional criteria (e.g. mandatory modules, credit requirements) for intermediate awards is outlined in the sections below.		
Award	Criteria	Awarding body
Diploma in Higher Education (DipHE)	Pass in 210 credits of which at least 90 must be at or above FHEQ Level 4 and at least 120 of which must be at or above FHEQ Level 5	Royal Holloway and Bedford New College

Certificate in Higher Education (CertHE)	Pass in 120 credits of which at least 90 must be at or above FHEQ Level 4	Royal Holloway and Bedford New College
--	---	--
