

Teenage reading: What do we know and what can we do?

Professor Jessie Ricketts

Background

What do we know?

What can we do?

Overview

- Background
 - Why teenage reading?
 - Establishing a shared understanding of reading
- What do we know?
 - Development of reading knowledge and skills, behaviour...
- What can we do?
 - Collaborate (more)

Background

What do we know?

What can we do?

Why teenage reading?

Why teenage reading?

What teachers and school leaders were telling me:

- We are concerned, and not just about those with the most need
- We don't know what to do
- We don't have the training, capacity, resources

The research context:

- There's nothing interesting going on

There is a lot going on with teenage reading

The educational policy context:

- We are focusing on primary reading

Reading is not just a primary issue

Why teenage reading?

- Adequate reading is crucial for accessing the curriculum
 - Every subject
 - Likely greater influence as students get older
- Expectations of independence increase
 - Can 'read to learn'
- Reading needs will be a barrier to exam performance

access to the curriculum

assessing the
outcomes of learning

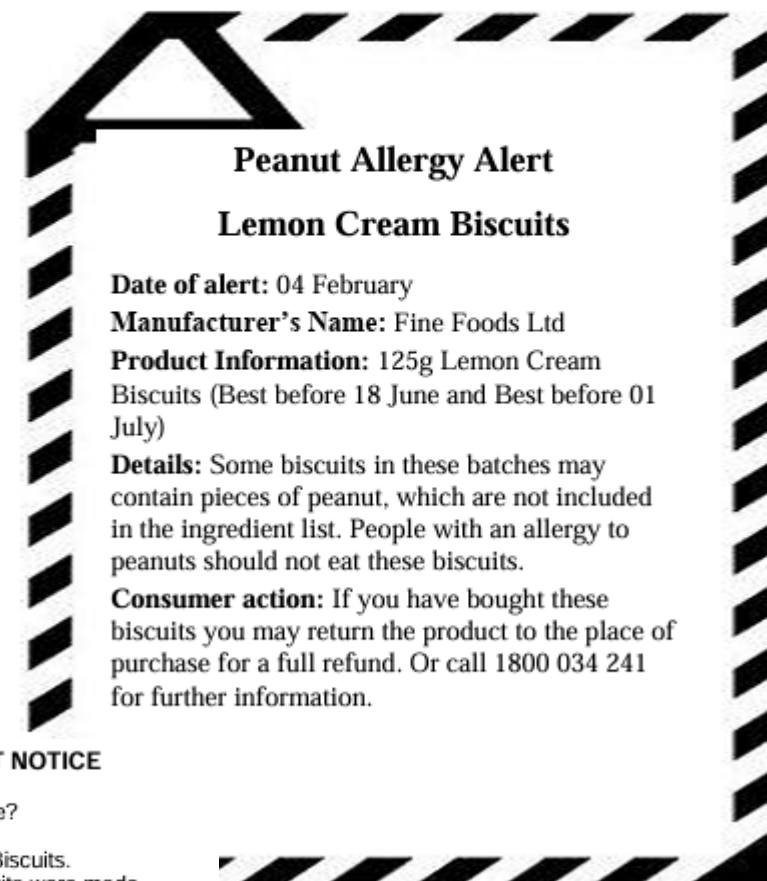

Why teenage reading?

There is much need... and it matters for everyday life

- 20% of teenagers (15 years) show reading below acceptable standards

(e.g. PISA, 2015; Jerrim & Shure, 2016)

Question 2: SUPERMARKET NOTICE

What is the purpose of this notice?

- A To advertise Lemon Cream Biscuits.
- B To tell people when the biscuits were made.
- C To warn people about the biscuits.
- D To explain where to buy Lemon Cream Biscuits.

Why teenage reading?

We knew very little about reading development in adolescence (some hints: Foorman et al., 2015; Reynolds & Turek, 2012; Francis et al., 1996)

- Growth to 15y but slows over time?

Much is changing in adolescence

- Reading-related brain regions (Ben-Shachar et al., 2011)
- Language processing (Dawson et al., 2017)
- Reading behaviour (Cole et al., 2022: National Literacy Trust)

Background

What do we know?

What can we do?

Establishing a shared understanding of reading

Different things to different people

What is reading?

word
recognition

Mockingbirds don't do one thing but make music for us to enjoy. They don't eat up people's gardens, don't nest in corncribs, they don't do one thing but sing their hearts out for us. That's why it's a sin to kill a mockingbird.

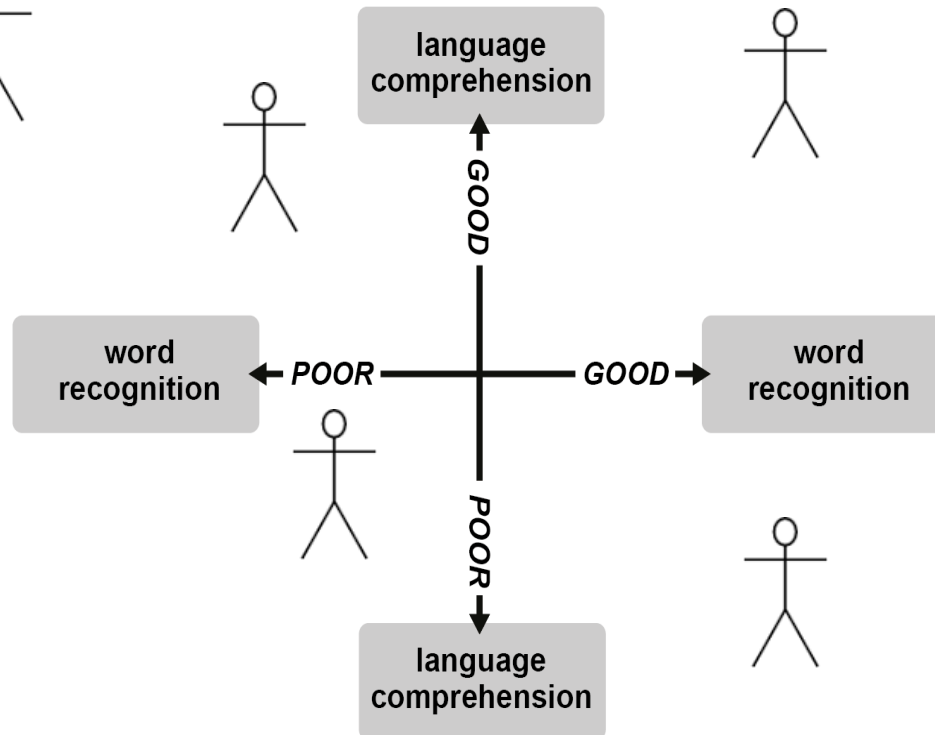

language
comprehension

A broader definition of reading

- Knowledge and skills, but also:
- behaviour (e.g. frequency)
- affect (e.g. motivation, engagement)
- (and lots of other things, there are many definitions of reading)

What is reading for us, today?

The Simple View of Reading

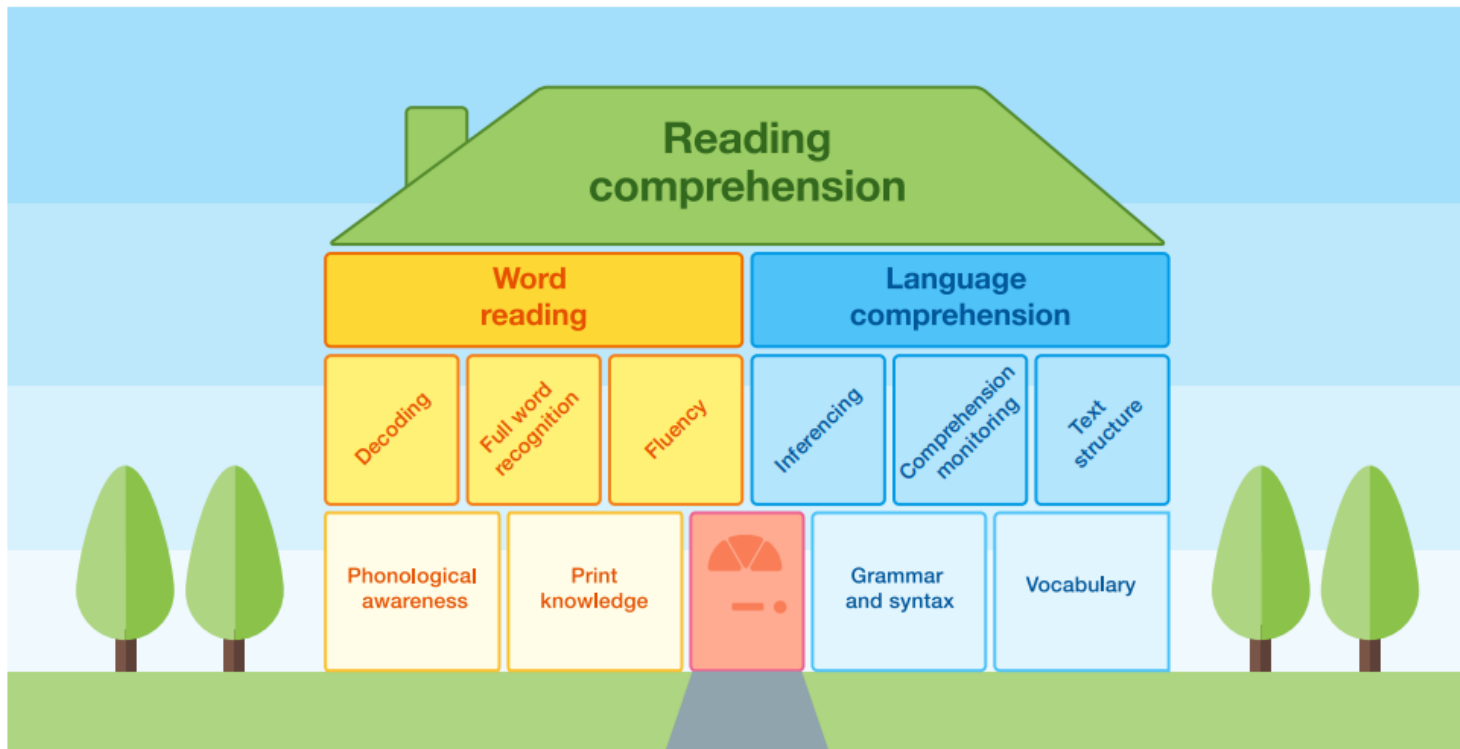

- Both word recognition and language comprehension are necessary for successful reading, neither sufficient
- Relative contribution changes with age and experience (e.g. Nation, 2019; LARRC, 2015)
- Learning to read and teaching of reading is not simple but framework is simple
- Adopted by Rose Reviews (2006; 2009), National Curriculum 2013 and in initial teacher education

Another way of representing this

The Reading Comprehension House

Adapted from Hogan, Bridges, Justice, and Cain (2011)

Both word reading and language comprehension are complex, in their own right

Many pressure points or barriers to successful reading

<https://educationendowmentfoundation.org.uk/news/eef-blog-supporting-reading-comprehension-in-key-stage-2>

Is the simple view too simple?

word
recognition

Mockingbirds don't do one thing but make music for us to enjoy. They don't eat up people's gardens, don't nest in corncribs, they don't do one thing but sing their hearts out for us. That's why it's a sin to kill a mockingbird.

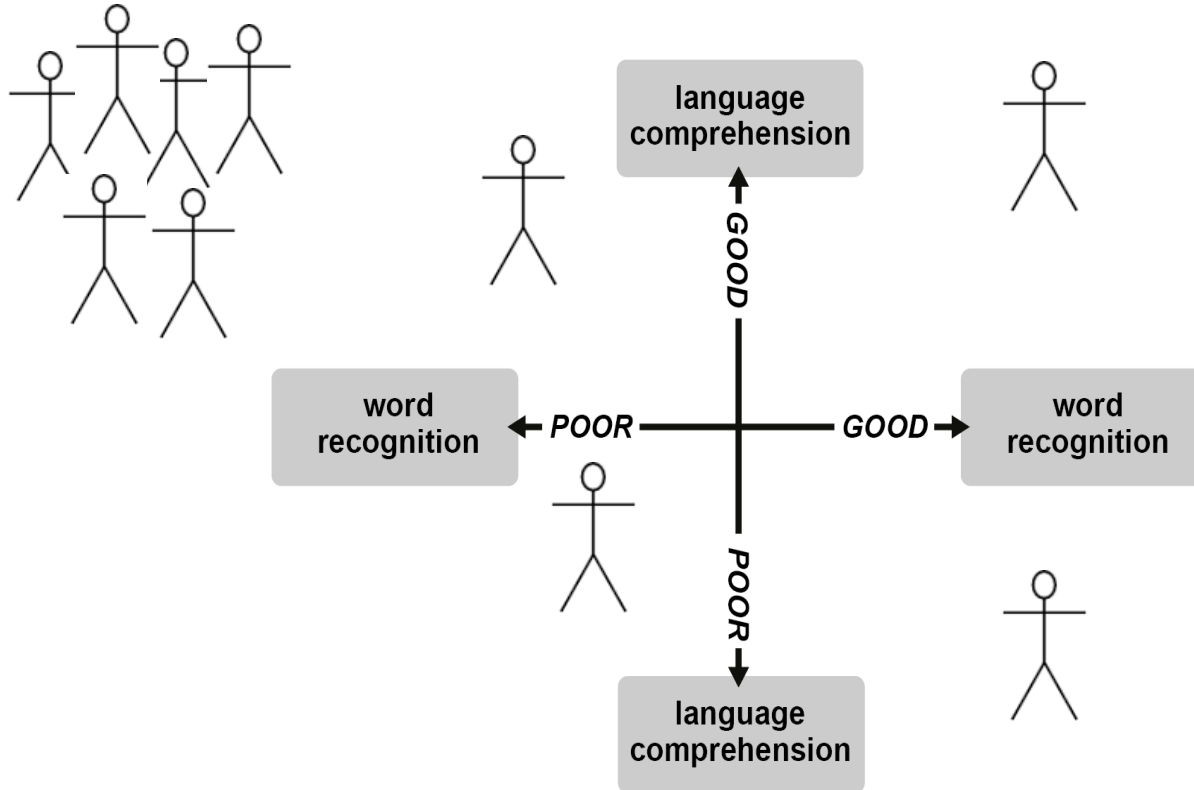

language
comprehension

Not developmental
Components not independent
(e.g. Nation, 2019)

And of course reading is about more than this...

Simple but effective

Identify need

Target intervention

Evaluation intervention

Background

What do we know?

What can we do?

What do we know? Development and variation

My approach

- Combining **longitudinal** and **experimental** data to understand how individuals are different from each other and change over time
- Collaboration to navigate the **gap** between research and practice

Reading and Vocabulary (RAV)

primary-secondary transition

- Word-level reading
- Reading comprehension
- Also, spoken vocabulary

Teenage reading development?

- Growth: Is there progress over time?
- Stability (Bornstein et al., 2014; 2016): Does pecking order stay the same over time?
- Spread: What happens to the gap between the least and most able readers?

- Evidence from children: progress, high stability, widening of gap
- Teenagers?

Teenage reading development?

- Significant growth
- High stability (rank order preserved)
- Evidence of compensation: narrowing (but not closing) the gap

BUT

- Enormous variability
- Poorest performing 10-20%:
 - not exceeding levels of the average 9-year-old
 - can't assume they can access the secondary curriculum, will constrain outcomes

What next?

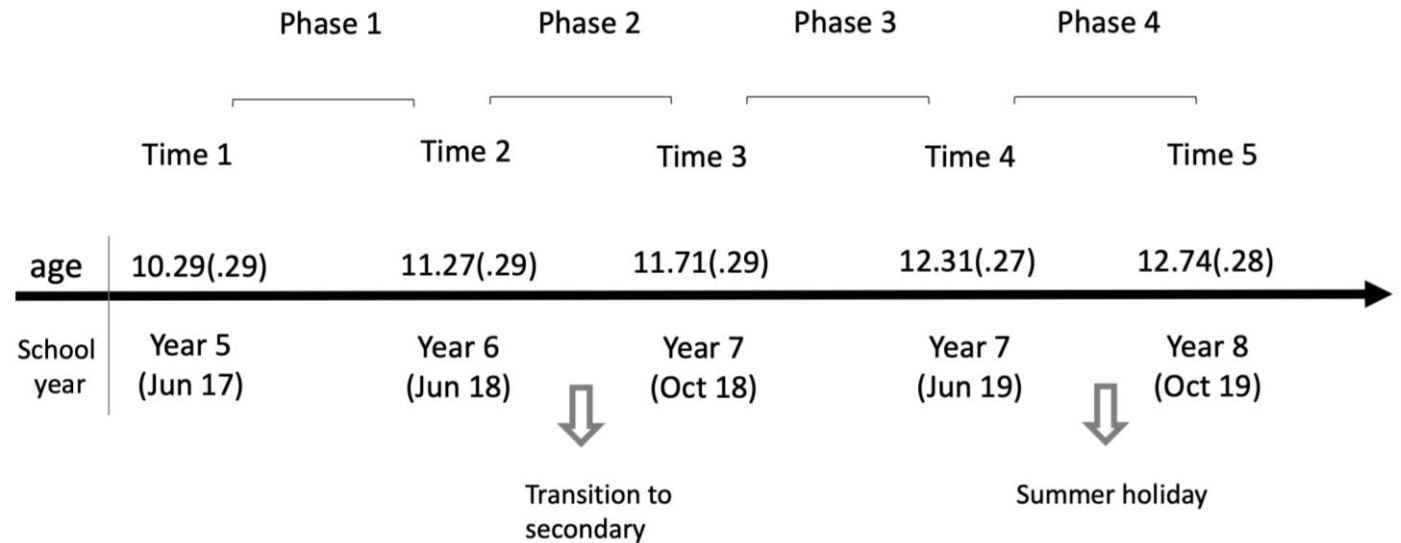

- Teenage reading development – are we sure?
- Transition 'slump'? We need a robust test:
 - consistent and objective measures
 - comparison between transition summer and non-transition summer
- Socio-economic status (SES) **gaps**: differences between children from more or less affluent families?
- What about reading engagement?

- Word-level reading
- Reading comprehension
- Spoken vocabulary (everyday)

Also,

- Curriculum vocabulary
- Behaviour, motivation, engagement...
- SES: free school meals and/or mother's education

Teenage Reading Development

Replication... confidence

- Some progress
 - Stability
 - Spread/gaps
 - Huge variation
-
- This presents a real challenge for teachers and universal instruction

High levels of reading need

- Can't 'fix' things in primary because some needs:
 - are persistent despite excellent instruction and support
 - emerge later as the challenge increases
- Reading is not just a primary issue
- Need continuous support into and through secondary

Transition 'slump'?

- No transition slump
- Shift in challenge, expectations and context
- We need a joined up approach

And the gaps?

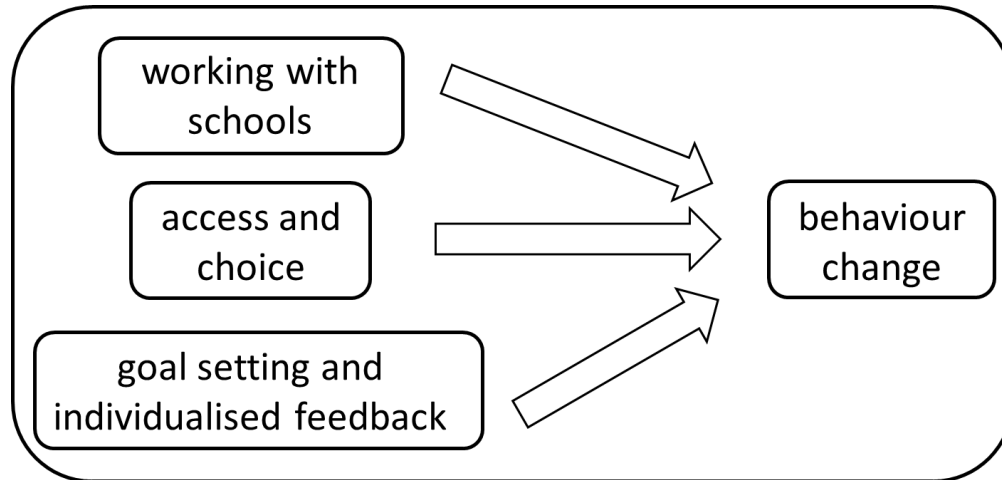

----- High SES
—— Low SES

- SES gaps for some but not all aspects of reading (and vocabulary)
- Again, gaps aren't widening, but are persistent
- We need to work to narrow (not close!) gaps

Can we promote engagement?

Teenagers don't read much... what can we do?
A large naturalistic experiment...

Pre-test

Practice diary and
drop-in session

Reading phase
(10 weeks)

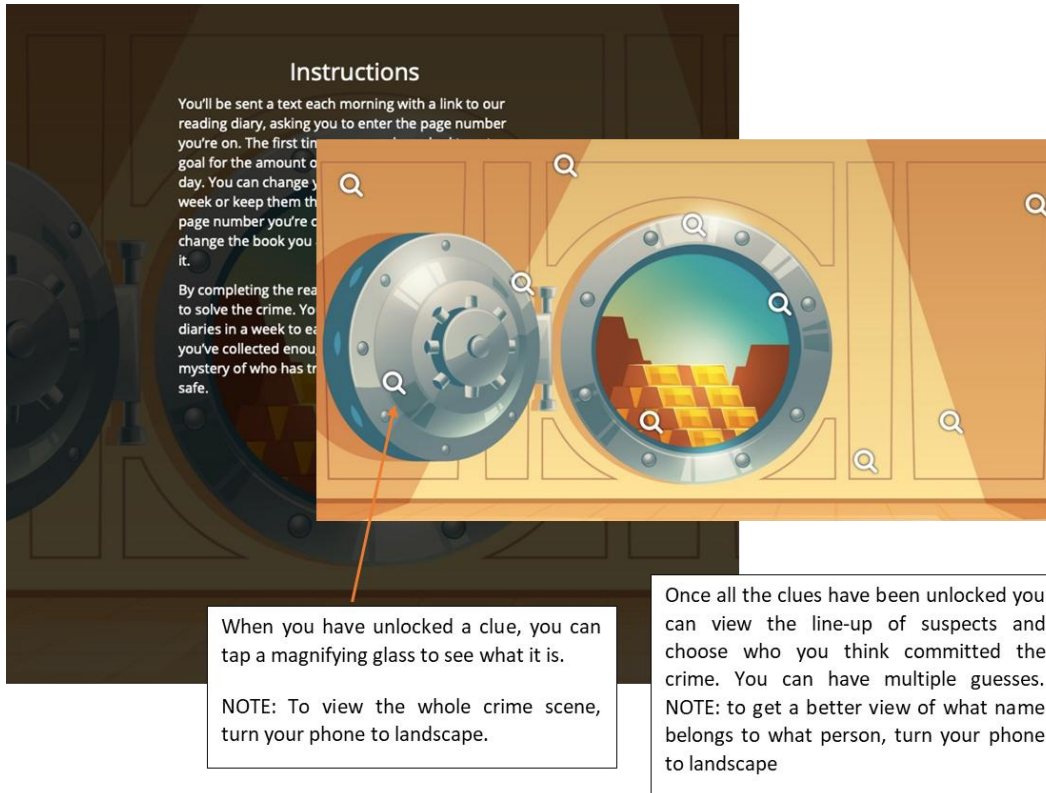

Post-test

Half complete a diary...

Completing the diary unlocks clues to solve the case

Can we promote engagement?

Success: Tracking vocabulary growth

When adolescents read real books because they choose to, in their own time, the *quantity* of leisure-reading is linked to vocabulary growth

tempest....

...tempest....

.....tempest....

BUT little engagement

- Despite developing an attractive tool with input from experts, teachers and teenagers, few participants completed the diary consistently

We need to collaborate more deeply...

Proficiency and engagement

- Virtuous circle, BUT
 - 'can' does not mean 'do' and 'do' does not mean 'can'
 - proficiency must come first

Proficiency, behaviour and affect...

There are high levels of reading need in secondary school

Evidence indicates a need to target the following in secondary students:

- **reading proficiency**, including word and text reading accuracy, reading fluency and reading comprehension
- **reading behaviour**, supporting choice of reading materials and encouraging more reading
- **reading affect**, including how motivated students are to read, how enjoyable they find reading

<https://literacytrust.org.uk/research-services/research-reports/reading-in-secondary-students-what-do-we-know/>

What do we know?

- There is progress alongside high stability
- There is huge variation, with high levels of need
- Transition from primary to secondary school is marked by a shift in challenge and expectation rather than a slump in knowledge and skills
- Promoting engagement is not easy, and we can't assume that primary approaches will be successful
- We need to integrate approaches to support proficiency and engagement

What does this all mean?

1. Professional development must be prioritised
2. Don't worry about the transition slump
3. Reading is not (just) a primary school issue
4. Both proficiency and engagement matter
5. Two-step assessment can help (more on this later)

Teenage Reading Network

Convened in 2023 to:

1. Create capacity and partnerships around teenage reading, ready for collaborative work
2. Foster interdisciplinary working and shared learning to tackle common goals
3. Identify priorities for research, practice and policy

Priorities resonated with work planned and underway

1. Co-create assessment frameworks to guide decision making
2. Co-produce professional development
3. Listen to students, work with them

Priorities for research

Teaching & Support

- Effective CPD - reading development
- Approaches to develop whole school reading

Pupil Voice

- Barriers/facilitators to teenage reading

Measuring progress

- Role/impact of common school practices

Transition

- Impact of cognitive overload & reading demands

Priorities for teaching

Whole school reading culture

- Ensuring reading is celebrated in school
- Pupils have access and choice of books aligning to interests

Teacher confidence

- Staff have confidence to support reading across subjects

Critical thinking

- Pupils develop critical thinking across different mediums and genres

Priorities for policy

Assessment

- Ensuring assessments are accurate and fair

Curriculum

- Relevant to young people
- Guidance about secondary reading, including transition

OF LONDON

Increasing engagement?

“If Molly-Mae Hague were to post a video of her reading, I reckon more people would read”.

Authors: Tia Fisher

Booktok: Natali Crystal

The bottom line...

- We need robust research and evidence BUT...
- Implementation is important
- We need truly collaborative research to:
 - work with (not at!)
 - generate questions, priorities
 - do the translational research (in context)
 - ensure effectiveness of approaches in context
 - also... feasibility, acceptability, accessibility
 - and that it can all be actioned

effectiveness

feasibility

acceptability

Background

What do we know?

What can we do?

What do we know?

Reading is complex and important for outcomes

Development: important changes over time

Very variable (and spoken language is crucial)

Knowledge, skills and engagement are all important

What can we do?

We need to take a collaborative approach

- To co-create research
- To implement evidence-based practice, evaluate its impact

Acknowledgements

- Thank you for listening!
