

SEPnet Grand Challenge Conference

12th & 13th September

University of Southampton, Garden Court

Proudly showcasing the very best of SEPnet's collaborative research

This not to be missed, free of charge event will highlight and demonstrate the notable achievements and successes made across the network and the Physics community as a whole

SEPnet

South East Physics Network GCSE Programme

Open to everyone with a link to SEPnet

This exciting two day conference will cover the four SEPnet research themes:

- Astrophysics
- Atomic Condensed Matter
- Particle Physics
- Radiation Detection and Instrumentation

Consisting of talks, presentations and workshops from SEPnet researchers and leading academics, attendees are encouraged to create a personalised agenda incorporating aspects from all four research themes

Important information:

We warmly welcome any requests to be a speaker

Priority booking will go to SEPnet fellows, PhD students and their supervisors

The free full board and overnight accommodation packages will be offered on a first come, first served basis
